Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, ***at the time the application was filed, had possession of the claimed invention.*** Specifically, Claims 1-3 and 13 now recites accommodating thermal expansion and contraction or displacing air with fluid. There is no mention of such in the specification as originally filed.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The scope of the claim is unascertainable due to the

reference to claims 1-3. Applicant is advised to recite those elements in claims 1-3 that applicant wished to include in the scope of claim 13.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1, *as understood*, is rejected under 35 U.S.C. 102(b) as being anticipated by Moore (3,661,202), which shows all of the claimed limitations including, among other things, a closed heat transfer loop (see at least fig. 16), a one-way out pressure relief valve and a one-way in vacuum relief valve (see at least fig. 18) plumbed in parallel from the highest point in the solar system to the bottom of an unpressurized, partially filled overflow/recovery reservoir 36, and excluding air (see at least col. 3, lines 37-39).

7. Claims 2, 3, and 13, *as understood*, are rejected under 35 U.S.C. 102(b) as being anticipated by Hardy (4,360,003), which shows all of the claimed limitations including, among other things, a one-way out pressure relief valve 74 and a one-way in vacuum relief valve 65 plumbed in parallel from the highest point in the solar [collection] system (see at least col. 6, lines 39-44) to the bottom of an unpressurized, partially filled overflow/recovery reservoir 36 (see at least figures 2 and 3). Hardy recites that such an

arrangement provides for over-temperature and over-pressure protection (see at least last line of claim 1).

Response to Arguments

8. Applicants' arguments with regard to the rejected claims have been considered, but are not deemed fully persuasive.

a. Applicant asserts that various elements of the amended claims are not disclosed by the prior art applied thereto. Nevertheless, these elements are deemed new matter for their failure to be disclosed in the specification as originally filed.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
